

SAN PELLEGRINO POMPELMO (GRAPEFRUIT)

Country: Italy

Category: Mineral Water

Winery: San Pellegrino

Type: Mineral Water

Tasting Notes: A sparkling grapefruit mineral water with 12% fruit juice. The water originates from a layer of rock 400 m below the surface, where it is mineralized from contact with limestone and volcanic rocks. It emerges from three deep springs at a temperature of about 22 °C. The surrounding area, located on the Do range, favors the formation and replenishment of a mineral water basin. The water then seeps to depths of over 700 m and flows underground to a distant aquifer.

Vintage: N/A
